

ACTION: Proposed rule.

SUMMARY: On May 15, 1991, the State of North Carolina, through the North Carolina Department of Environment, Health and Natural Resources, submitted revisions to the North Carolina State Implementation Plan (SIP) to EPA. These revisions include the correcting of an address; the limiting of emissions of particulates from fuel burning indirect heat exchangers; the elimination of a conflicting statement on updating referenced regulations; the addition of compounds whose emissions will not be considered in nonattainment areas; the changing of the allowable emission limits for several boilers; and the clarification of the permit requirements for replacement of existing equipment; and for sources subject to PSD requirements. In the final rules section of this Federal Register, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the EPA views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

DATES: To be considered, comments must be received by March 15, 1996.
